The Sol Shnider, M.D. Obstetric
Anesthesia Meeting Returns!

Welcome to the 2010 Sol Shnider, M.D. Obstetric Anesthesia Meeting

We are pleased to announce the return of the Sol Shnider, M.D. Obstetric Anesthesia Meeting, which was established in 1976 by Sol Shnider M.D. and the University of California San Francisco, and directed by Samuel C. Hughes, M.D. and Mark A. Rosen, M.D. for more than 25 years. The Society for Obstetric Anesthesia and Perinatology is excited to sponsor this meeting in 2010, which will be held March 12-14 at the Grand Hyatt Hotel on Union Square in San Francisco, California. The Sol Shnider M.D. Meeting promises to be exceptional! Please plan to arrive early to attend the UCSF Ultrasound Workshop for Regional Anesthesia on Thursday, March 11, 2010.

See you in San Francisco!
Best Regards,

Program Information

Mission of SOAP

The purpose of the Society is to provide a forum for discussion of the medical problems unique to the peripartum period and to promote excellence in medical care, research and education in anesthesia, obstetrics, obstetric medicine and neonatology.

Accreditation and Designation

The Society for Obstetric Anesthesia and Perinatology is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to sponsor continuing medical education for physicians.

The Society for Obstetric Anesthesia and Perinatology designates this educational activity for a maximum of *17 AMA PRA Category 1 Credit(s)*[™]. Physicians should only claim credit commensurate with the extent of their participation in the activity.

This program has been approved by the American Association of Nurse Anesthetists for 17 CE credits; Code Number 32181; Expiration Date 3/14/2010.

Mission of SOAP Program Committee

The mission of the Society's Program Committee is to provide anesthesiologists, obstetricians, and other physicians and members of related allied health specialties with the knowledge that will reinforce past learning as well as disseminate new concepts, practices, and skills involving anesthesia and analgesia for the pregnant woman.

Educational Format

CME activities may include the following formats: plenary sessions, debates, lectures, problem-based learning, and skill-set workshops.

Target Audience

This meeting is intended for specialists in anesthesiology to include anesthesiologists, nurse anesthetists, residents and fellows. Pediatricians, neonatologists, perinatologists, obstetricians, general practitioners, delivery room nurses, nurse midwives, and clinical pharmacologists may also find educational benefit. The program is generated from member requests and an assessment of need by the program committee. Attendance at this meeting does not guarantee competency or proficiency in the performance of any procedures which may be discussed or taught during the meeting.

Participation in the 2010 SOAP Sol Shnider, M.D. Obstetric Anesthesia Meeting

Attendance shall be open to all health practitioners, provided that they have registered for the meeting. CME credit will only be offered to M.D.s, D.O.s or the equivalent. A completed Physician Verification of Attendance form must be turned in to SOAP at the conclusion of the meeting. The form will be available onsite.

Special Needs Assessment

The Society for Obstetric Anesthesia and Perinatology is committed to making its activities accessible to all individuals and fully complies with the legal requirements of the Americans with Disabilities Act and the rules and regulations thereof. If you are in need of an accommodation, please do not hesitate to call the SOAP office at 847-825-6472 and/or submit a description of your needs in writing to soap@asahq.org.

PLEASE NOTE: These links are for the Thursday, March 11, 2010 UCSF workshop only; to register for Sol Shnider you must complete the Sol Shnider meeting registration form.

Program Learning Objectives

Neuraxial Analgesia for Labor and Delivery

Upon completion of this presentation, participants will be able to identify new techniques and strategies to optimize labor and delivery analgesia. In addition, participants will be able to develop strategies to avoid cannulation of epidural veins during these techniques.

Complications of Neuraxial Analgesia

Upon completion of this presentation, participants will be able to explain the relationship between neuraxial analgesia and fetal bradycardia, maternal fever, neuraxial infection, and neurological complications associated with neuraxial analgesic techniques. In addition, participants will be able to discuss strategies to manage these complications.

Mother, Fetus and Newborn:

Upon completion of this presentation, participants will be able to determine obstetric and perinatal issues that can impact the anesthetic management of pregnant women. In addition, participants will be able to explain factors associated with anesthesia-related maternal mortality.

Anesthetic Considerations for Cesarean Delivery

Upon completion of this presentation, participants will be able to appraise rational strategies for the use of oxytocin and vasopressors during cesarean delivery. In addition, participants will be able to develop rational plans for the management and monitoring of postcesarean analgesia.

Preeclampsia, Bleeding Time and Resuscitation

Upon completion of this presentation, participants will be able to discuss the current management of emergency cesarean delivery, team response to massive obstetric hemorrhage, essentials of maternal cardiopulmonary resuscitation, and management of maternal anaphylaxis, amniotic fluid embolism, and maternal respiratory depression. In addition, participants will be able to explain current concepts for neonatal resuscitation.
