Accreditation & Designation

The Society for Obstetric Anesthesia and Perinatology is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Workshop on Neonatal Resuscitation Program

The Society for Obstetric Anesthesia and Perinatology designates this educational activity for a maximum of 4 credits in category 1 credits toward the AMA Physician's Recognition Award. Each physician should claim only those hours of credit that he/she actually spent in the educational activity.

37th Annual Meeting

The Society for Obstetric Anesthesia and Perinatology designates this educational activity for a maximum of 18.5 credits in category 1 of the AMA Physician's Recognition Award. Each physician should claim only those hours of credit that he/she actually spent in the educational activity.

Mission of SOAP

The purpose of this Society is to provide a forum for discussion of medical problems unique to the peripartum period and to promote excellence in medical care, research and education in anesthesia, obstetrics, and neonatology.

Mission of SOAP Program Committee

The mission of the Society's Program Committee is to provide anesthesiologists, obstetricians, and other physicians and members of related allied health specialties with the knowledge that will reinforce past learning as well as disseminate new concepts, practices, and skills involving anesthesia and analgesia for the pregnant woman.

Goals of the SOAP 2005 Program

Educational Format

1. To provide ongoing CME activities designed to teach our audience how to best provide analgesia for labor and anesthesia for cesarean delivery and other procedures during pregnancy and postpartum period;
2. To provide an Annual Scientific Meeting to the members as a forum for discussion that includes the opportunity for expression of new clinical insights, presentation of research in progress with discussion of ways to enhance that research, clinical applications of research and courses that will enhance the practice of obstetrical anesthesiology;
3. To provide a forum for discussions dealing with specific issues that will enhance the effectiveness and cost efficiency of obstetrical anesthesia and analgesia;
4. To provide information and a forum for discussion on subjects which have been requested by members of the previous annual meeting and via needs assessment requests.

CME activities may include the following formats: Plenary sessions, debates, lectures, poster discussions, oral abstracts, problem-based learning, and skill-set workshop.

Participants in the SOAP 2005 Program

Attendance shall be open to all health practitioners, provided that they have registered for the meeting. CME credit will only be offered to MDs, DOs or equivalent. A Verification of Participation form must be turned in to SOAP at the conclusion of the meeting. The form will be available in the meeting syllabus and online following the meeting.

Meeting Objectives

Workshop on Neonatal Resuscitation Program

After completing this course, participants will learn how to do the following:

- Changes in physiology that occur when a baby is born.
- Describe the steps to follow during newborn resuscitation.
- Identify the risk factors that can help predict which babies will require resuscitation.
- Demonstrate the correct use of resuscitation equipment and personnel.
- Open the airway and provide the initial steps of resuscitation.
- Resuscitate newborns when meconium is present.
- When to give bag-and-mask ventilation.
- Correct placement of masks on the newborn's face.
- Evaluate the success of bag-and-mask ventilation.
- When to begin and end chest compressions during a resuscitation.
- Coordinate chest compressions with positive-pressure ventilation.
- When and why endotracheal intubation is needed during resuscitation.
- Use the endotracheal tube to suction meconium from the trachea.
- Use the endotracheal tube to administer positive-pressure ventilation.
- When to give medications during a resuscitation.
- Administer epinephrine through an: endotracheal tube, umbilical vein.
- When and how to administer IV fluids intravenously during a resuscitation.
- When and how to administer sodium bicarbonate to correct acidosis during a resuscitation.
- Subsequent management of the baby who has required resuscitation.
- Ethical considerations about starting and stopping resuscitation.
- How the principles in the program can be applied to babies who require resuscitation beyond the immediate newborn period or outside the hospital delivery room.

Fred Hehre Lecture: Pain And Delivery – Why, What, and When

To discuss pain during birth in animals and humans, its neural basis and short- and long-term consequences and how genetic and hormonal factors alter pain after delivery and its long-term consequences.

What's New in Obstetrics?

At the conclusion of this lecture, you will be able to:

1. Discuss the new concepts in the field of general obstetrics from the calendar year 2004.
2. Discuss the implications of new obstetric research for the practicing obstetric anesthesiologist.

What's New in Obstetric Medicine?

Following this lecture, the learner will:

1. Discuss new findings in the area of internal medicine as they relate to the practice of obstetrics and obstetric anesthesia.
2. Become familiar with the North American Society for Obstetric Medicine (NASOM).

Panel Discussion: International Aspects of Obstetric Anesthesia

Following this session, the learner will be able to:

1. Discuss the challenges of the practice of obstetric anesthesia in countries other than the USA;
2. Discuss how these challenges might influence our own practice of obstetric anesthesia in the USA.

Breakfast with the Experts

Following this session, the learner will have:

1. Reviewed the management of a complex case;
2. Learned the steps that need to be undertaken to determine the most appropriate management.

Gerard W. Ostheimer Lecture: What's New in Obstetric Anesthesia?

Following this session, the learner will be able to:

1. Identify published contributions from the 2004 calendar year relevant to obstetric anesthesia.
2. Critically evaluate the implications of these contributions on the provision of clinical anesthetic care or the conduct of research for the obstetric patient.

Pro/Con Debate: Is Cell Salvage a Safe Technique for the Obstetric Patients?

Following this session, the learner will be able to:

1. Discuss the implications of the use of cell salvage in obstetric patients.
2. Discuss the arguments for and against the use of this technology in the obstetric population.

Research Hour

After the session, the attendee will:

1. Learn some of the new techniques and approaches in obstetric anesthesia research;
2. Understand the potential and limitation of new approaches to obstetric anesthesia research;
3. Understand the impact of new research on our knowledge and practice of obstetric anesthesia.

JW Marriott Desert Springs Resort & Spa Amenities

Room with a View

Upon entering JW Marriott Springs Resort & Spa, you can't help but feel you've been transported to a tropical paradise.

Water, water everywhere! The glittering pools and lakes entice you to splash, dash and cool off in this dazzling desert escape. As the sun warms you, you'll hear the calypso music of a steel drum band calling you to poolside. Stroll through the colonnade of inviting boutiques on your way to a day of fun in the sun.

As mascots of free spirits, hummingbirds are a flutter throughout the grounds, while exotic parrots, macaws and cockatoos inhabit the magnificent lobby with the feel of a breezy tropical oasis. On the lower lobby level, a gondola awaits you to board for a boat ride to your favorite resort dining spot or an afternoon tour or customized charter of your own.

There are many tasteful diversions at a dozen of the resort's restaurants – from the Northern Italian dishes of Ristorante Tuscany to the sushi bar at Mikado... from morning espresso and Krispy Kremes at Starbucks to dancing in the wee hours in the desert's most hip nightclub, Costas.

If you like to swing, drive one of the resort's two 18-hole championship golf courses, designed by famed golf course architect, Ted Robinson, the "King of Waterscapes". For a day on the go, start with tennis on clay or grass tennis courts, then switch to a little pitch 'n putt or croquet.

Room Amenities

Desert Springs is committed to making your guestroom as inviting as our desert surroundings:

Custom Bedding, Birch Armoire Entertainment Center with in-room movies, Triple-sheeted beds, Seasonal nightly turn-down service, mini bar, Convenient data ports & electrical outlets, Sony CD Player, Granite vanities, Limestone floors, shower & tubs surrounds, Custom bathroom lighting, High-speed Internet access provided by STSN, Patio/Balcony

Kid's Klub

Guests ages 4-12 can take advantage of many of the resort's fun activities through Kid's Klub, Marriott's activity program designed to inspire creativity and friendships under the supervision of trained Kid's Klub counselors. While parents are indulging in their own personalized and memorable resort experience, their children will develop new friendships and express themselves in a variety of action-packed adventures. Their creativity will soar as they take part in the many wonders awaiting them at the Desert Springs Kid's Klub. Our professional and qualified counselors will lead them on a fun-filled journey that exercises both imagination and body in a safe and worry-free environment.

Event schedule, fees and parental release information available onsite.
