

SIGs

Special Interest Groups

A Special Interest Group (SIG) is a community within our organization with a shared interest in a focused area of knowledge. SOAP SIGs provide forums to connect people who have similar clinical interests or professional backgrounds in obstetric anesthesiology.

What is the purpose of SOAP SIGs?

SOAP SIGs are a new offering to SOAP members with the goal to facilitate inspiring environments and networking opportunities. SIGs will foster organic interactions and allow SIG members sharing a common interest in a specific area to learn from each other, compare clinical practices, and network directly with members who may be experts in that field.

What is the focus of a SOAP SIG?

The focus of a SIG is directed by its members. The focus area should be broad and inclusive enough to allow a community of SOAP members to gather around the topic of interest.

How would I start a SOAP SIG?

A SIG may be directly proposed by SOAP members using the New SIG Application Form. The application will include a short title and description of the area of interest, the name of the SOAP Committee that will serve as the SIG's liaison with the SOAP Board of Directors, and the names of at least five and up to ten current SOAP members to get things started.

How can I join a SOAP SIG?

All SIGs are listed on the SOAP membership application and renewal forms, as well as on the SOAP website to engage SOAP members.
